Product Status Update - SPCEvo controller series - MRSP update

Dear customer,

Acre security is delighted to announce a pricing update for the following products. As per January 1st the list prices on the EVO panels and licenses have been decreased.

		EUR	GBP	NOK	SEK	DKK	USD	EUR – K1	K1-GBP	K1-NOK	K1-SEK	K1-DKK	K1-USD
SPC42	SPC42 intrusion controller grade 2	525,00	453,00	6.110,00	6.129,00	3.912,00	571,00	525,00	453,00	6.110,00	6.129,00	3.912,00	571,00
SPC53	SPC53 intrusion controller grade 3	750,00	647,00	8.728,00	8.755,00	5.588,00	816,00	750,00	647,00	8.728,00	8.755,00	5.588,00	816,00
SPC52	Upgrade license to SPC52 Intrusion Panel	135,00	117,00	1.571,00	1.576,00	1.006,00	147,00	135,00	117,00	1.571,00	1.576,00	1.006,00	147,00
SPC63	Upgrade license to SPC63 Intrusion Panel	180,00	156,00	2.095,00	2.102,00	1.342,00	196,00	180,00	156,00	2.095,00	2.102,00	1.342,00	196,00

Please inform/update

your customers accordingly, especially for distribution who would need to adjust list prices in their systems, customer discounts remain unchanged.

Especially important

for customers using EDI connections as there will be a mismatch in the prices between their system and our system.

Feature and benefits from the SPCEvo controller series

Benefit from the

outstanding improvements of the EVO central generation and its advantages. This is the best opportunity to order your own SPCEvo intrusion panel and convince yourself from the outstanding features and improvements.

Enhancements and improvements:

- More powerful PSUs
- Upgradeable license to increase system capabilities
- Guided and web-based commissioning process
- Fully compatible with X-BUS periphery portfolio
- Fully compatible with acre's Two-Way-Wireless portfolio
- Available as EN grade 2 and Grade 3 variant
- Complies with national regulations

Talking points / reasoning (internal info):

- After more than 13 years the SPCgen 1 controller series will be phased out in Q4/2025
- This pricing adjustment will support the evo controller series introduction in all regions
- Customers should place their last time buy order qty by April 2025 (if order qty exceeds >100pcs)
- The SPCevo series bases on the SPCgen1 series but comes with significant enhancements
- Both series sharing the same user GUI and configuration experience, which is minimizing the need for training
- In addition both platforms are equally supported from acre's SaaS offering acre Intrusion Connect

Equivalent controller variants:

SPC4320 – SPC42

SPC5320 – SPC52 (via license
upgrade)

SPC5330 – SPC53

SPC6330 – SPC63 (via license
upgrade)
